LIST OF ACRONYMS

PUBLICATIONS

1 DESIGNING ASSEMBLY LINE

1 INTRODUCTION	1
2 DESIGNING OR OPTIMISING?	5
3 ASSEMBLY LINE DESIGN	7
4 LAYOUT OF THE THESIS	9
5 REFERENCES	10

2 DESIGN APPROACHES

1 INTRODUCTION	13
2 WHY IS THE DESIGN PROBLEM DIFFICULT?	15
3 DESIGN METHODS: STATE OF THE ART	17
4 DESIGN AND SEARCH APPROACH	21
5 ASSEMBLY LINE DESIGN : THE GAP BETWEEN THEORY AND PRACTICE	23
5.1. INPUT DATA	24
5.2. MULTIPLE OBJECTIVE	24
5.3. VARIABILITY	24
5.4. SCHEDULING	25
5.5. LAYOUT	25
5.6. ITERATIVE PROCESS AND INTERACTIVITY	25
6 ABOUT THE QUALITY OF A DESIGN	25

7 ASSEMBLY LINE DESIGN EVOLUTION	27
8 SUMMARY AND FURTHER WORKS	28
9 REFERENCES	28

3 ASSEMBLY LINE: HISTORY AND FORMULATION

1 EVOLUTION OF TODAY'S MANUFACTURING ISSUES	31
1.1. FIRST METALS	32
1.2. CARPENTERS AND SMITHS	32
1.3. COTTAGE INDUSTRIES	33
1.4. FACTORY SYSTEM	33
1.5. MASS PRODUCTION	34
1.6. COMPUTER IN MANUFACTURING	34
2 INTRODUCTION TO ASSEMBLY LINE BALANCING	35
3 ASSEMBLY LINE SYSTEMS	36
4 NOTATIONS AND DEFINITIONS	37
5 ASSEMBLY LINE BALANCING PROBLEMS	39
5.1. ASSEMBLY LINE MODELS	40
5.1.1. Single product line	40
5.1.2. Mixed-production line	40
5.1.3. Batch production line	41
5.2. BATCH OR MIXED PRODUCTION	41
5.3. VARIABILITY OF TASKS PROCESS TIMES	42
5.3.1. Deterministic time	42
5.3.2. Stochastic time	43
5.3.3. Hidden times	43
5.3.4. Dynamic time	43
5.4. LINE CONFIGURATION	43
5.4.1. Serial lines	44
5.4.2. U-shaped lines	44
5.4.3. Parallel stations	45
5.4.4. Parallel lines	45
5.4.5. Workcenters	46
5.5. ADDITIONAL CONSTRAINTS	46
5.5.1. Fixed operations on stations	47
5.5.2. Linked operations	47
5.5.3. Must directly precede	47
5.5.4. Associative and dissociative constraints	48
5.5.5. Positions of operations	49
5.6. ASSEMBLY LINE DESIGN PROBLEMS	49
5.6.1. Line balancing	49

5.6.2. Resource planning	51
5.6.3. Ordering variants	52
6 WHY IS THE BALANCING PROBLEM HARD TO SOLVE?	53
7 CONCLUSIONS	54
8 REFERENCES	54

4 EVOLUTIONARY COMBINATORIAL OPTIMISATION

1 CAUSES OF VARIABILITY	60
2 NATURAL EVOLUTION	60
3 SYSTEM ORGANISATION	62
3.1. MAPPING	62
3.2. HOW DOES IT WORKS?	63
4 HOW DOES THE GA IMITATE THE NATURAL EVOLUTION?	65
4.1. REPRESENTATION	66
4.1.1. Encoding	66
4.1.2. Feasibility	67
4.1.3. Chromosomes and solutions spaces	69
4.2. INITIALISATION OF THE POPULATION	70
4.3. SAMPLING MECHANISM	71
4.4. GENETIC OPERATORS	74
4.4.1. Crossover	74
4.4.2. Mutation	75
4.4.3. Inversion	76
5 LANDSCAPES AND FITNESS	76
6 POPULATION	77
7 SIMPLE... BUT IT WORKS!	77
8 REFERENCES	78

5 MULTIPLE OBJECTIVE GROUPING GENETIC ALGORITHM

1 INTRODUCTION	82
2 MULTIPLE OBJECTIVE OPTIMISATION	84
3 STATE OF THE ART	87
3.2. USE OF AGGREGATING FUNCTIONS	87
3.3. NON-PARETO APPROACHES	88
3.4. PARETO-BASED APPROACHES	90
3.5. PREFERENCES AND LOCAL SEARCH METHODS	91
3.6. CONSTRAINED PROBLEMS	92
4 GROUPING PROBLEMS AND THE GROUPING GENETIC ALGORITHM	93

4.1. GROUPING PROBLEMS	93
4.2. GROUPING GENETIC ALGORITHM (GGA)	94
5 MULTIPLE OBJECTIVE GROUPING GENETIC ALGORITHM (MO-GGA)	96
5.1. CONTROL STRATEGY	98
5.2. INDIVIDUAL CONSTRUCTION ALGORITHM	98
5.3. OVERALL ARCHITECTURE OF THE EVOLUTIONARY METHOD	99
5.4. BRANCHING ON POPULATIONS	100
6 AN ACADEMIC EXAMPLE	103
7 SUMMARY AND APPLICATIONS	109
8 REFERENCES	109

6 APPLYING THE EQUAL PILES APPROACH TO BALANCE ASSEMBLY LINE

1 INTRODUCTION	113
2 STATE OF THE ART	114
2.1. EXACT METHODS	114
2.1.1. Dynamic programming	115
2.1.2. Branch and bound	116
2.1.3. Graph search technique	118
2.2. APPROXIMATED METHODS	118
2.2.1. Simple heuristic methods	119
2.2.2. Metaheuristics	122
3 EQUAL PILES FOR THE ASSEMBLY LINE BALANCING	126
3.1. MOTIVATION AND INSPIRATION FROM NATURE	127
3.2. DEFINITION OF THE EQUAL PILES FOR ASSEMBLY LINE PROBLEM	128
3.3. INPUT DATA	128
3.4. CUSTOMISING THE GGA TO THE EPAL PROBLEM	128
3.4.1. Boundary stones algorithm	129
3.4.2. Dealing with precedence constraints	132
3.4.3. Heuristics	132
3.4.4. Cost function	133
3.5. EXPERIMENTAL RESULTS	134
4 EXTENSION TO MULTI-PRODUCT ASSEMBLY LINE	136
4.1. MULTIPLE OBJECTIVE PROBLEM	136
4.2. OVERALL ARCHITECTURE	137
4.2.1. Input data	138
4.2.2. Performance of the solutions	138
5 CONCLUSIONS AND FURTHER WORKS	140
6 REFERENCES	141

7 THE RESOURCE PLANNING FOR ASSEMBLY LINE

1 INTRODUCTION	145
2 STATE OF THE ART	146
3 DEALING WITH REAL-WORLD HYBRID ASSEMBLY LINE DESIGN	152
3.1. COST	153
3.2. PROCESS TIME	153
3.2.1. Hidden time inside a FG	153
3.2.2. Hidden times between FGs	155
3.3. AVAILABILITY	156
3.4. STATIONS SPACE	157
3.5. INCOMPATIBILITIES AMONG SEVERAL TYPES OF EQUIPMENTS	157
4 INPUT DATA	158
5 OVERALL METHOD	159
5.1. DISTRIBUTING TASKS AMONG STATIONS	160
5.1.1. Equal piles Algorithm	160
5.1.2. Mode preferences	161
5.2. SELECTING EQUIPMENTS	161
5.2.1. Branch and cut algorithm	162
5.2.2. How and where does the user intervene?	164
5.3. HEURISTICS	164
5.4. DEALING WITH MULTI-PRODUCT ASSEMBLY LINE	166
5.5. COMPLYING WITH HARD CONSTRAINTS	167
6 APPLICATION OF THE METHOD	168
7 CONCLUSIONS AND FURTHER WORKS	169
8 REFERENCES	169

8 BALANCE FOR OPERATION

1 INTRODUCTION	175
2 MULTI-PRODUCT ASSEMBLY LINE	177
3 STATE OF THE ART	179
3.1. CLASSICAL METHODS	180
3.2. HEURISTICS	181
4 ORDERING GENETIC ALGORITHM	184
4.1. ALGORITHM	185
4.1.1. Encoding Scheme	185
4.1.2. Crossover	185
4.1.3. Mutation	185
4.1.4. Inversion	186
4.1.5. Evaluation	186

4.2. HEURISTICS	187
5 BALANCE FOR OPERATION CONCEPT	189
5.1. NON FIXED NUMBER OF STATIONS	190
5.2. FIXED NUMBER OF STATIONS	193
6 CONCLUSIONS AND FURTHER WORKS	193
7 REFERENCES	194

9 EVOLVING TO INTEGRATE LOGICAL AND PHYSICAL LAYOUT OF ASSEMBLY LINE

1 INTRODUCTION	197
2 STATE OF THE ART	198
3 ASSEMBLY LINE DESIGN	200
4 INTEGRATED APPROACH	204
4.1. DEVELOPMENT OF THE INTERACTIVE METHOD	206
4.2.1. Workcenter clustering	207
4.2.2. Kinds of workcenter links	209
4.2. GLOBAL SEARCH PHASE	213
5 APPLICATION	215
6 SUMMARY AND FURTHER WORKS	217
7 REFERENCES	217

10 CONCURRENT APPROACH TO DESIGN ASSEMBLY LINE

1 INTRODUCTION	219
2 CONCURRENT APPROACH	220
3 ASSEMBLY LINE DESIGN	221
3.1. DATA PREPARATION PHASE	222
3.2. OPTIMISATION PHASE	222
3.3. MAPPING PHASE	223
4 CASE STUDIES	224
4.1. ALB APPLICATION : OUTBOARD MOTOR	224
4.2. RP APPLICATION : CAR ALTERNATOR	227
5 CONCLUSIONS AND FURTHER WORKS	233
6 REFERENCES	233

11 CONCLUSIONS

1 WE ATTAINED...	235
------------------	-----

2 TENDENCIES AND ORIENTATIONS	236
3 DATA COLLECTION	237
4 MODEL FORMULATION	237
5 VALIDATION AND OUTPUT ANALYSIS	238
6 A PROPOSED APPROACH	238

APPENDICES

1 SEARCH AND SEARCH SPACE	243
2 DETERMINISTIC OR RANDOM SEARCH METHODS	247
3 PROMETHEE	251
4 RESULTS OF THE EQUAL PILES ALGORITHM	255
5 STATIONS CLUSTERING RESULTS	263
6 MARINE POWER RESULTS	265
7 DESCRIPTION OF THE CAR ALTERNATOR	271
