

GENETIC ALGORITHMS
FOR
MULTI-OBJECTIVE OPTIMIZATION

Tadahiko Murata

February 1997

Doctoral Thesis at Osaka Prefecture University

GENETIC ALGORITHMS FOR MULTI-OBJECTIVE OPTIMIZATION

Tadahiko Murata

Submitted in Partial Fulfillment of the
Requirements for the Degree of
Doctor of Engineering

at
Graduate School of Engineering
Osaka Prefecture University
Osaka, Japan

February 1997

ACKNOWLEDGEMENTS

It is my pleasure in acknowledging the help and encouragement of all who have supported and assisted me during the study reported in this thesis.

First I would like to express my sincere gratitude and appreciation to Professor Hideo Tanaka, my thesis guidance supervisor, for his guidance, advice, and encouragement throughout the course of this work. His valuable discussions have simulated me to complete this work. My special thanks are extended to Professor Hidetomo Ichihashi and Professor Hiroyuki Nagasawa for helpful suggestions and discussions on my dissertation panel. I am also grateful to Professor Hiroshi Ohta for his innumerable suggestions and comments.

I would also like to express my sincere thanks to Associate Professor Hisao Ishibuchi for his stimulating discussions and heartfelt suggestions throughout my days in the Tanaka laboratory. His supervision has directed my interest toward the research area reported in this thesis.

I am also deeply grateful to all members of the Tanaka laboratory who have assisted me in completing this thesis. My special thanks are also extended to Ms. Midori Matsumoto for her kind assistance and encouragement.

Finally, I am grateful to my parents and brothers, Tomohiko, Tomoko, Hiroaki, and Toshiaki Murata for their support and encouragement.

February 1997

CONTENTS

1	INTRODUCTION	1
2	GENETIC ALGORITHMS FOR OPTIMIZATION PROBLEMS	5
2.1	Introduction	5
2.2	Genetic Algorithm for Single-Objective Optimization Problems	7
2.2.1	<i>Coding</i>	7
2.2.2	<i>Evaluation</i>	8
2.2.3	<i>Selection</i>	9
2.2.4	<i>Crossover</i>	10
2.2.5	<i>Mutation</i>	12
2.2.6	<i>Elitist strategy</i>	13
2.2.7	<i>Genetic algorithm</i>	13
2.3	Genetic Algorithm for Multi-Objective Optimization Problems	15
2.3.1	<i>Background of multi-objective genetic algorithms</i>	15
2.3.2	<i>Evaluation</i>	18
2.3.3	<i>Selection</i>	19
2.3.4	<i>Elitist strategy</i>	20
2.3.5	<i>Multi-objective genetic algorithm</i>	21
2.3.6	<i>Computer simulations and discussions</i>	23
2.4	Summary	29
3	GENETIC ALGORITHMS FOR FLOWSHOP SCHEDULING PROBLEMS	31
3.1	Introduction	31
3.2	Flowshop Scheduling Problems	33
3.3	Genetic Operators for Permutation Strings	35
3.3.1	<i>Crossover</i>	35
3.3.2	<i>Mutation</i>	37
3.4	Positive and Negative Combination Effects of Genetic Operators	40
3.4.1	<i>Flowshop scheduling problems</i>	40

3.4.2	<i>Performance measure</i>	42
3.4.3	<i>Effectiveness of genetic operators</i>	42
3.4.4	<i>Examination of crossover operators</i>	43
3.4.5	<i>Examination of mutation operators</i>	45
3.4.6	<i>Combination of genetic operators</i>	46
3.4.7	<i>Selection of genetic operators and their probabilities</i>	47
3.5	Comparison with Other Search Algorithms	51
3.5.1	<i>Other search algorithms</i>	51
3.5.2	<i>Simulation results</i>	52
3.6	Hybridization of Genetic Algorithms with Other Search Algorithms	55
3.6.1	<i>Genetic local search</i>	55
3.6.2	<i>Genetic simulated annealing</i>	57
3.6.3	<i>Simulation results</i>	57
3.6.4	<i>Sensitivity of the performance of the genetic local search algorithm to parameter specifications</i>	59
3.7	Summary	63
4	GENETIC ALGORITHMS FOR MULTI-OBJECTIVE FLOWSHOP SCHEDULING PROBLEMS	65
4.1	Introduction	65
4.2	Genetic Algorithms and Multi-Objective Flowshop Scheduling Problems	67
4.2.1	<i>Parameter specifications</i>	67
4.2.2	<i>Two-objective flowshop scheduling problems</i>	68
4.2.3	<i>Three-objective flowshop scheduling problem</i>	72
4.3	Multi-Objective Genetic Local Search Algorithm	74
4.3.1	<i>Multi-objective genetic local search algorithm</i>	74
4.3.2	<i>Two-objective flowshop scheduling problems</i>	77
4.3.3	<i>Three-objective flowshop scheduling problem</i>	80
4.4	Summary	82
5	GENETIC ALGORITHMS FOR DESIGNING FUZZY CLASSIFICATION SYSTEMS	83
5.1	Introduction	83
5.2	Fuzzy Classification Systems	86

5.2.1	<i>Generation of fuzzy classification rules</i>	86
5.2.2	<i>Fuzzy reasoning for classifying new patterns</i>	90
5.3	Genetic Algorithms for Linguistic Rule Selection	92
5.3.1	<i>Rule selection problem</i>	92
5.3.2	<i>Application of genetic algorithms</i>	94
5.3.3	<i>Extension to hybrid genetic algorithm</i>	99
5.4	Genetic Algorithms for Fuzzy Partition of Pattern Space	103
5.4.1	<i>Coding of fuzzy partition</i>	104
5.4.2	<i>Genetic algorithm for adjusting membership functions</i>	106
5.4.3	<i>Computer simulations</i>	109
5.4.4	<i>Hybrid genetic algorithm</i>	112
5.5	Summary	114
6	GENETIC ALGORITHMS FOR MULTI-OBJECTIVE LINGUISTIC RULE SELECTION	115
6.1	Introduction	115
6.2	Single-Objective Genetic Algorithms for Multi-Objective Linguistic Rule Selection	116
6.2.1	<i>Variable weights</i>	116
6.2.2	<i>Constraint condition on the number of rules</i>	118
6.2.3	<i>Constraint condition on the number of correctly classified patterns</i>	119
6.3	Multi-Objective Genetic Algorithm for Multi-Objective Rule Selection	122
6.4	Multi-Objective Genetic Algorithm with Learning Procedure	126
6.5	Multi-Objective Genetic Algorithm for High-Dimensional Classification Problems	129
6.5.1	<i>Restriction on candidate linguistic classification rules</i>	131
6.5.2	<i>Generation of candidate fuzzy if-then rules</i>	134
6.6	Summary	135
